Barr's Daffodil Catalogue, 1920.

PRACTICAL HINTS ON BULB CULTURE.

Culture for Spring-flowering Bulbs out of Doors.

Proper Condition of Soil.—Plant bulbs only when the ground is in a nice friable state, and never when the soil is wet and sticky ; in such cases plant later when the soil is in a good friable condition. After digging or trenching, the ground should be allowed to settle at least ten days before planting.

Depth to Plant.—Failures with bulbs are most frequently due to their having been planted too deeply or too shallow. A good general rule to follow is to cover the bulb with soil once and a half to twice its own depth, *measuring the bulb from base to shoulder*. Thus a daffodil bulb measuring two inches from base to shoulder should be covered with three to four inches of soil. The principal exceptions to this rule are Crocuses, which prefer shallow planting, and Erythroniums, Snowdrops and Tulips, which require deeper planting. We give special directions for these bulbs in body of our General Bulb Catalogue.

Manure for Bulbs.—The ammonia in fresh stable manure is fatal to bulbs and is often the cause of failure in growing Tulips, Daffodils, etc., therefore only well-decayed stable or cow manure, or the material from an exhausted hot-bed, should be used. The best general manure for all bulbs growing outdoors is our PHYTOBROMA (which contains in suitable proportions Sulphate of Potash, Steamed Bone Flour, etc.) ; this should be forked into the ground at planting time at the rate of 3 oz. to the square yard, and a surface dressing of 3 oz. to the square yard applied early in spring (well hoed in) when top growth is showing. For heavy soils BASIC SLAG is good ; this should be put in the ground with the bulbs at time of planting at the rate of $7\frac{1}{2}$ oz. to the square yard. For light and sandy soils CRUSHED BONES can be recommended, put into the ground at time of planting at the rate of 2 oz. to the square yard, and after planting sprinkle on the surface of the ground SULPHATE OF POTASH at the rate of $\frac{3}{4}$ oz. per square yard. On hot dry and sandy soils, old stable manure may with advantage be used, to act as a sponge to hold moisture in the soil ; it should be dug in 15 to 18 inches deep, so as not to come in contact with the bulbs. In the case of bulbs which have not been lifted we recommend a top dressing (well hoed in) of PHYTOBROMA or Bone Flour in November and again in January or early February, at the rate of 3 oz. to the square yard. *Price List of Manures will be found on page 32.*

Top Dressing.—Where possible, we advise a top dressing to all bulbs through the winter months of some light material such as long straw litter, cut heather, cut furze branches, or PEAT-FIBRE. The advantage of this light covering is that it keeps the surface soil sweet by preventing the heavy winter rains from beating down the earth's crust ; it also protects any early top growth.

Lifting and Replanting.—When bulbs are lifted they should not, if possible, be replanted on the same ground, but where other bulbs or plants have previously been growing : thus, where Tulips have been growing last season, plant Daffodils this autumn, and so on.

Time to Plant.—We give this information under the heading of each family in our General Bulb Catalogue.

Culture for Spring-flowering Bulbs in Pots or Boxes.

Time of Potting.—September and October are best months for potting most Spring-flowering bulbs.

The best compost to use is a mixture of two-thirds good fibrous loam (which should be pulled to pieces by the hand, *and not passed through a sieve*) and one-third old decayed leaf soil, with a sprinkling of sharp silver sand, adding $1\frac{1}{2}$ lbs. of bone meal or 1 lb. of Phytobroma to every bushel of soil, which mix well together before using. In all cases the soil used should be fresh and sweet ; *never pot in soil that is wet or sticky*. Our Peat-Fibre, Shell and Charcoal Mixture (*see page 32*) may also be used ; it is light and cleanly to handle, and is a suitable medium for growing all kinds of spring-flowering bulbs in pots or vases, either for indoor decoration or for cutting.

Sterilising Soil.—In order to destroy all injurious insect life it is a good plan to sterilise potting soil before adding the Phytobroma or bonemeal. We recommend for this purpose the KONDINE SOIL STERILISER, or small quantities of soil can be easily sterilised in a sack by pouring over it a large kettle of boiling water and then spreading out the soil to dry. This will prevent a great deal of after trouble from worms or insects attacking the bulb roots.

The pots should be carefully washed and allowed to dry before using ; new pots should be well soaked. *Never pot in dirty or wet pots.*

Good drainage should be secured by placing three or more pieces of charcoal (in preference to broken crocks) over the drainage hole, covering the charcoal or crocks with a little rough fibre from the loam. When boxes are used, the slit at bottom of box should be covered with pieces of charcoal, and a good layer of rough fibrous loam or leaf soil placed at bottom of box to ensure perfect drainage.

CULTURE OF BULBS IN POTS OR BOXES—continued.

Covering the Bulbs.—The larger bulbs need not be quite covered with soil, the level of which should be half an inch below the rim of the pot, to allow of watering when the bulbs are in growth.

After potting, stand the pots or boxes outside in the open, on a firm bottom such as a bed of gravel or a gravel path to prevent the entrance of worms. They should then be surrounded and completely covered with Peat Fibre, Cocoa Fibre, or old decayed leaf soil (ashes from gas works are dangerous as being often very poisonous to plant life), the top of the pots being 2 inches below the surface of the covering material. This will secure a natural and moist condition to the bulbs and encourage root action. So long as the pots or boxes remain buried in this way they will require no watering.

The pots or boxes should remain plunged for about twelve weeks (Roman and Italian Hyacinths rather less), in order that the bulbs may get well rooted, after which portions may be removed indoors in succession, selecting first those which bloom naturally early. Place first in a cold frame, cool greenhouse, or cold sitting-room free from draughts, and keep partially shaded for a few days, giving water gradually. Very weak liquid manure-water may then be given once a week until they come into flower. Those that are wanted in bloom early may, after the flower buds are advanced, be placed in a warmer temperature, such as a slow forcing-house, but this should never exceed 65° if fine blooms are desired. The plants should always be kept as near to the glass as possible and not allowed to get drawn, from an insufficient supply of light or air. *On no account should bottom heat be given.* A frequent mistake made in forcing bulbs is that they are removed from the plunging-bed too early, before they have made a sufficient quantity of fibrous roots; they are then at once subjected to heat, and failure is the result. It is a good plan, when bulbs are removed from the plunging-bed, to place an inverted flower-pot over them for a day or two to prevent any check from draughts to the young top growths.

Pot-Culture of Early Giadioli, Ixias, Sparaxis, Tritonias, Babianas, etc.

These bulbs start early into growth and therefore should not be potted up before the end of October to November. The pots should be plunged up to the rim only (not covered) in a cold frame, and protected with mats during severe frosty weather. There they should remain for about three months, after which the treatment is similar to that for Spring-flowering bulbs.

**Culture of Spring-Flowering Bulbs in Vases and Bowls,
in Barr's New Peat-Fibre, Shell and Charcoal Mixture.**

A charming effect can be obtained by growing spring-flowering bulbs in fancy vases and bowls, with or without drainage, by using our **Peat-Fibre Mixture** (4s. 6d. per bushel, 1s. 6d. per peck); the mixture is light, clean, and nice to handle, and remains sweet (an important matter where the vases used have no drainage holes); indeed, it is in every way preferable to soil for growing bulbs in bowls and vases.

NARCISSUS POETAZ ELVIRA

growing in Barr's Peat-Fibre Mixture

is allowed at any time to become dry, even for a day, the flower buds will probably become blind; should by any chance too much water have been given, the bowls may be drained by carefully tipping them on their side. If obtainable, rain water is the best to use.

When the bulbs have made some top growth the bowls should be removed to the sunny window of a sitting room, where they will get the morning sun, or be kept in a cool greenhouse close to the glass, as it is necessary that they should be given sufficient light and air to prevent the foliage from becoming drawn up. For a few days the bowls should be covered with tissue paper until the young growth has become accustomed to the light. Draughts and gas heat must be carefully avoided.

No bottom heat should be given, and a temperature of 55° to 60° by day and 50° to 55° by night is sufficient to obtain good blooms; the bulbs resent too warm a temperature.

**For Collections of Bulbs for Bowl Culture, see page 4 of this Catalogue, and
page 3 of our General Bulb Catalogue.**

Culture.—Fill the vase or bowl with the **Peat-Fibre Mixture** up to within a little below the rim, and plant the bulbs in the same manner as with ordinary potting soil; the mixture should be shaken down into place after planting and lightly watered, but should not be pressed down tightly, or the bulbs will be forced upwards when root growth commences.

After planting, adopt either of the following plans:—

(a) The bowls may be placed outdoors and covered entirely with Peat-Fibre or Cocoa fibre, leaving them thus for 8 to 12 weeks (Early Roman and Italian Hyacinths rather less), when the bulbs will have made good fibrous roots.

(b) Or the bowls may be plunged in a cold frame, airy cellar, or out-house instead of outdoors; with this treatment, however, it will be necessary to occasionally give water.

(c) A third plan is to place the bowls after potting in a dark or moderately dark *airy* room, cool but not too cold; they must not be placed in a close cupboard or the bulbs will certainly suffer.

In the case of bowls plunged outdoors there will be no need to give any attention in the way of watering, as they will of course have abundance of moisture from the autumn rains. Where, however, the bulbs are not exposed to rain, the bowls should be examined once or twice a week, care being taken that the fibre mixture is kept uniformly damp; but for the first week or two after planting water should be given very sparingly, sufficient only to encourage root action. As soon as the bulbs are well rooted, water may be given more freely, the fibre mixture being then kept quite moist; if the mixture

Naturalising Bulbs and Plants in Grass, Woodlands, etc.

BULBS NATURALISED IN GRASS IN A LONDON PARK.

This fascinating phase of gardening deserves more attention than has hitherto been bestowed upon it. No sight is more delightful than the fresh brightness of spring flowers growing freely in grass land or lending colour to woodland walks, hedgerows, and ditches, here and there nestling at the foot of trees, or establishing themselves on sloping banks.

For naturalising in grass spring flowers are especially suitable, as they bloom and are over before the grass grows tall enough to hide their beauty. Amongst our spring-flowering bulbs there are many gems which refuse to grow in cultivated borders, but when planted in grass, where they enjoy a cooler and more even temperature, they soon become established, and multiply freely until a regular colony is formed which greatly adds to the charm of the landscape.

All formality of arrangement should be avoided, the bulbs being scattered freely from the hand and planted where they fall. Large irregular breaks of one kind of bulb should be made in order to obtain the finest effect. In planting under trees, select spots where the soil is deepest and where the drip is least.

Those whose gardens are of limited size might make them very beautiful in spring, by utilising the fringes of their lawns and any grassy mounds or shady shrubbery walks for such spring favourites as Daffodils, Anemones, Scillas, Crocuses, Chionodoxas, etc., reserving the borders for Tulips and Lilies, etc., also summer- and autumn-flowering herbaceous plants. In large gardens and parks ample opportunities are afforded for naturalising spring-flowering bulbs, and very beautiful results may be attained in this way.

In planting bulbs *in grass*, Barr's Bulb Planter (see page 32) should always be used. It cuts out a clean piece of turf, leaving a hole to receive the bulb, and on making the second cutting clears itself of the first piece of turf, which lies ready at hand for covering the bulb. This handy implement saves an immense amount of time, and does not, as with an ordinary dibber, leave a hard resting-place for the bulb, while by its use *the grass is not in the least disturbed*. Planting should not take place while the ground is hard, but after the first autumn rains. If the ground is poor, a compost of fresh soil with an abundance of Crushed Bones (7 lbs. to a bushel) or Phytobroma (3 lbs. to bushel) should be made and a little of the compost dropped into each hole before placing in the bulb, a little more should be given as a covering, and then the sod of turf be replaced and pressed down. The bulbs will then be given a fair start in their new quarters. It is advisable to cut the grass as late in Autumn as possible, so as to ensure it being short at the time the bulbs flower. In meadowland Spring-flowering bulbs in no way affect the hay crop, which may be cut at the usual season.

Among the many gems which lend themselves to wild gardening and naturalising, we would specially mention the following:—*Alliums*, *Anemones*, *Anthericums*, *Chionodoxas*, *Crocuses*, *Cyclamen*, *Daffodils*, *Dog's Tooth Violets* (*Erythronium dens-canis*), *Fritillaries*, *Funkias*, *Helleborus*, *Hemerocallis*, *Irises* (Tall and Dwarf Flag), *Muscari*, *Ornithogalums*, *Scillas* (early-flowering), *May-flowering Cottage Tulips*, and *Wood Hyacinths* (Late-flowering *Scillas*).

COLLECTIONS OF DAFFODILS

FOR FLOWER BORDERS, POTS, AND BOWL CULTURE.

Barr's 27/- Collection of Daffodils for Flower Borders.

The following varieties are all beautiful in the flower border, and the selection embracing early and late varieties gives a good succession of bloom. All are suitable for pot culture and will give an equally fine display in the greenhouse or sitting-room.

ALL STRONGEST SELECTED BULBS.

6 Emperor	6 Incomp. Lucifer	6 Leedsl Salmonetta
6 Golden Spur	6 " Sir Watkin	6 Odorus Campanelle
6 Bicolor Horsfieldii	6 Barril conspicuous	6 Poetaz Elvira
6 " Victoria	6 " Fair Maiden	6 Poeticus ornatus
6 Incomp. Firelight	6 " Seagull	6 " Minerva
6 " Frank Miles	6 Leedsl Mrs. Langtry	6 Codilins and Cream (double)

3 Bulbs each of the above 18 varieties for 14/-

Barr's 45/- Collection of Daffodils for Pot Culture.

The following Daffodils can be specially recommended for pot culture, and by gentle forcing a succession of bloom may be had through February and March, the selection containing early and later flowering varieties. If after flowering they are turned out of pots and carefully planted out (the ground being well watered previously, should it be dry) they will mostly flower well outdoors the following season. *For Cultural Directions see pages 1 and 2.*

ALL STRONGEST SELECTED BULBS.

6 Emperor	6 Incomp. Lucifer	6 Leedsl White Lady
6 Henry Irving	6 " Sir Watkin	6 Poetaz Elvira
6 Madame de Graaff	6 Barril Albatross	6 Poeticus Edna

 In addition to the above we recommend all the Polyanthus Narcissi offered on page 24.

Barr's Flower Border Mixture of Daffodils.

Although we are of opinion that a better effect is obtained by planting named varieties in separate groups, there are many who prefer a general mixture, especially for filling large beds, and the special mixture we offer here will be found admirably suited to this purpose.

Barr's Flower Border Mixture of Trumpets, Chalice Cup and Poet's Narcissi,
strong flowering bulbs, per 100, 21/-; per doz, 3/-.

Miniature Daffodils for the "Rock Garden."

The following are charming little subjects for rockwork, where their dainty flowers are seen to perfection. They should be left undisturbed for years, and, if happy, will soon establish themselves and afford a lovely picture in early spring. The ground may be carpeted with close-growing surface-rooting plants, such as *Acaena*, *Mossy Saxifragas*, and *Thymes*, etc.; these plants provide a natural protection for these little bulbs, besides keeping their dainty blooms from being splashed in rainy weather.

All Full descriptions of the following Miniature Daffodils will be found in body of Catalogue.

Barr's New Seedling Daffodils

Including New Varieties for 1920

The following list comprises some of the finest **New Seedling Daffodils** raised by ourselves and other well-known hybridists. We would specially draw attention to the following grand exhibition kinds: **Alpine Snow, Aylmer, Ben Alder, Challenger, Danesfield, Gladiator, Harpagon, Kingdom, Latona, Loch Fyne, Masterpiece, Milk and Honey, Morning Glory, Mrs. D. V. West, Nannie Nunn, Nightingale, Orange Glory, Ormolu, Pearl of Dew, Phineus, Primrose Gem, Prince Fushimi, Prince Arthur, Raeburn, Ringdove, St. Wendrona, Wendy, White Pearl, and White Star—all of great beauty.**

We have been awarded for New Seedling Daffodils—

The Engleheart Challenge Cup by the Royal Horticultural Society as First Prize for Twelve Best Seedling Daffodils not in commerce.

The Walter Ware Challenge Cup for the Best New Triandrus Hybrids. The R.H.S. Silver Standard Cup for the Best 12 New Seedling Daffodils.

The relative qualities as we judge them are indicated by xx, xxx, xxxx, the highest quality flower being given the most marks. The figures after the names indicate the relative period of flowering, (1) being earliest, (6) being latest.

	each.
Abadea (Leedsii) (3), xxxx, <i>new 1920</i> , a large refined flower measuring 4 inches across, with a beautiful smooth, white, flat perianth and elegant creamy white crown, ht. 22 in.	£ s. d. 0 15 0
Adelgar (Trumpet Daffodil) (3), xxx, a good bold flower with soft yellow perianth and golden-yellow trumpet, well frilled at mouth, ht. 18 in.	0 15 0
Alope (Triandrus Hybrid) (4) xxx, <i>new 1919</i> , flower large with primrose-yellow perianth and bold canary-coloured trumpet, ht. 13 in.	0 7 6
Alpine Snow (Leedsii) (4), xxxx, an exquisitely refined flower of the purest white, with round imbricated perianth and a daintily crimped globular cup, ht. 12 in.	0 15 0
Anteros (Incomparabilis) (3), xx $\frac{1}{2}$, fine bold flower, perianth cream, smooth, imbricated, and slightly reflexing, bold yellow cup, globular and fluted at mouth, ht. 19 in.; per doz. 16/-	0 1 6
Aylmer (Trumpet Daffodil) (3), xxxx, distinct and elegant, perianth bright yellow, smooth and campanulate, trumpet rich yellow, with rolled back brim, ht. 19 in.	1 1 0
Ben Alder (Trumpet Daffodil) (2), xxxx, <i>new 1920</i> , a very handsome flower of King Alfred type, but larger. It is also more easily grown, and produces strong robust plants, ht. 20 in.	1 10 0
Bonfire (Barrii) (3), xxxx, a grand showy flower, perianth yellow, flat and smooth, crown short, of a rich deep crimson, ht. 13 in.	0 15 0
Cadfer (Trumpet Daffodil) (3), xxx, <i>new 1920</i> , perianth white, broad and slightly twisted, trumpet long, lemon-yellow, ht. 15 in.	per doz. 16/- 0 1 6
Danesfield (Trumpet Daffodil) (4), xxxx, <i>new 1919</i> , an immense flower with broad white imbricated perianth and a bold canary-coloured trumpet, expanded and frilled at mouth; one of the largest of Bicolor Trumpet Daffodils and a very robust grower, ht. 17 in.	2 2 0
Discus (Barrii) (3), xxxx, a beautiful and symmetrical flower of great substance, perianth ivory-white, broad and imbricated, crown quite flat, lemon-yellow, shaded apricot at margin and with a deep green base, tall	0 10 6
Dorothy (Barrii) (3), xxx, a striking flower which might be described as an improved Firebrand, perianth cream, cup very dark orange-red, ht. 13 in.	0 5 6
Eldred (Trumpet Daffodil) (3), xxx, <i>new 1920</i> , large bold flower, perianth white, broad and campanulate, fine bold trumpet, delicate primrose, broadly frilled at mouth, ht. 17 in.	0 7 6
Feronia (Giant Leedsii) (4), xxxx, <i>new 1919</i> , flower of beautiful form measuring 4 $\frac{1}{2}$ inches across, perianth white with sulphur tinge at margin, erect and broad, crown cream, shaded pale lemon at margin, ht. 18 in.	0 7 6

Barr's New Seedling Daffodils—continued.

Gladiator (Giant Incomparabilis) (3), xxxx, new 1920, a grand flower, measuring 3½ inches across with creamy perianth and an immense open spreading crown, fiery red shading down to gold and beautifully fringed and flanged at margin, ht. 20 in.	each. £ s. d.	15 15 0
Glandore (Tazetta) (4), xxx, a charming Tazetta Narcissus bearing 5 to 7 sweet-scented flowers on a stem, perianth white, broad and rounded, cup soft primrose	0 3 6	
Golden Frill (Trumpet Daffodil) (1), new 1920, a wonderful sport from Golden Spur , flowers rich yellow, with trumpet deeply crested and frilled at mouth, very decorative	1 1 0	
Harpagon (Barrii) (3), xxxx, a lovely flower, perianth pale primrose, smooth, broad and imbricated, crown expanded, with brilliant orange-red margin, ht. 14 in. FIRST PRIZE FOR SINGLE BLOOM R.H.S. 1913	1 10 0	
Horizon (Barrii) xxx, perianth white and imbricated, crown flat and fluted, brilliant orange-red with green centre, very attractive, ht. 14 in.	0 7 6	
Hymen (Trumpet Daffodil) (3), xxxx, new 1919, flower of elegant form and delicate colour, perianth white, trumpet broad, soft primrose shaded cream and passing off almost white, mouth expanded and frilled, ht. 16 in.	0 7 6	
Ivorine (Leedsii) (3), xxxx, a perfectly formed flower and very refined, perianth broad and imbricated, glistening white, crown large and flat, of a beautiful ivory-white, ht. 16 in.	0 7 6	
Kestrel (Poeticus) (3), xxxx, a tall and stately variety of fine form and substance, perianth white, round and imbricated, eye flat and broad of an intense crimson-scarlet	0 5 6	
Kingdom (Giant Leedsii) (4), xxxx, a grand flower of Lord Kitchener type, but taller, perianth flat, imbricated and of great substance, crown creamy white, expanded and slightly recurved at brim, ht. 19 in.	2 2 0	
Lachlan (Giant Incomparabilis) (3), xx½, new 1920, large bold creamy white perianth and bright yellow crown, well frilled at margin, a good border variety, ht. 18 in....per doz. 10/6	0 1 0	
Lamond (Trumpet Daffodil) (3), xxx, new 1919, flower a pretty soft colour, perianth cream shaded sulphur, trumpet primrose shaded sulphur, of very elegant form, prettily frilled and flanged mouth, ht. 19 in.	0 12 6	
Latona (Trumpet Daffodil) (4), xxxx, a remarkably beautiful flower, measuring 4½ inches across, of a self buttery yellow, trumpet long with rolled back brim, very distinct, ht. 20 in.	5 5 0	
Leah (Trumpet Daffodil) (3), xxx, new 1920, a very elegant flower with smooth, flat, white perianth, trumpet opening cream and passing to pure white, ht. 16 in.	0 5 6	
Lemon Frill (Leedsii) (6), xxxx, new 1919, perianth solid white, cup pale lemon shaded cream, prettily frilled; a beautiful cool looking flower, ht. 21 in.	2 15 0	
Loch Fyne (Giant Leedsii) (3), xxxx, a grand flower, measuring 4½ inches across with ivory-white perianth, pointed and imbricated, and a large spreading pale lemon crown, prettily fluted, ht. 22 in.	0 15 0	
Masterpiece (Barrii) (4), xxxx, a model flower of exquisite symmetry, with very broad rounded cream-white perianth and a remarkably striking brilliant red flattened crown, very beautiful. AWARD OF MERIT R.H.S.	0 7 6	
Meshia (Trumpet Daffodil) (3), xxx, new 1920, a dainty flower of medium size, perianth white, elegantly twisted, trumpet creamy white, prettily frilled at brim, ht. 13 in.	per doz. 36/-	0 3 6
Milk and Honey (Double Incomparabilis), xxxx, new 1919, producing large double rose-like flowers of elegant form, white with lemon-yellow centre, lasting long in condition, very pretty; erect blue-green foliage, ht. 18 in. AWARD OF MERIT BIRMINGHAM, 1919...	1 1 0	
Morning Glory (Incomparabilis) (3), xxxx, a perfect exhibition flower of King Alfred colouring, deep golden yellow, large and of great substance, perianth flat and erect crown expanded at mouth and slightly fringed, ht. 17 in.	1 1 0	
Mrs. D. V. West (Trumpet Daffodil), xxxx, new 1915, a beautiful Daffodil raised by Mr. D. V. West, of Victoria, Australia; the flower is of elegant form, slightly drooping, and chaste in colour, measuring 4 inches across, with broad white well-imbricated perianth and a long trumpet opening delicate primrose developing to a creamy white with channelled mouth and slightly frilled edge, ht. 18 in.	2 2 0	
Nannie Nunn (Barrii) (4), xxxx, new 1919, a remarkably striking flower with rounded campanulate yellow perianth and broad cup of the most intense vermillion-scarlet, tinged brick-red, ht. 14 in.	1 10 0	

Barr's New Seedling Daffodils—continued.

		each.
		£ s. d.
Nightingale (<i>Poeticus</i>) (3), xxxx, new 1920, a very beautiful exhibition variety of perfect form with very thick rounded perianth of a glistening white, well imbricated, eye brilliant scarlet, ht. 16 in. AWARD OF MERIT R.H.S.		I I O
Noblesse (Trumpet Daffodil), xxxx, flower large, of great beauty, with pure white perianth, and long pale primrose trumpet shading to white, expanded deeply at brim.....	I I O	
Olivia (<i>Barrii</i>) (5), xxxx, new 1919, perianth solid pure white, slightly reflexing, crown large, flattened and fluted, canary-yellow, with very broad well defined scarlet margin	0 15 0	
Orange Glory (<i>Cyclamineus Hybrid</i>) xxxx, new 1920, a very striking variety, bred from a yellow trumpet <i>Cyclamineus</i> hybrid ; it has a yellow reflexing perianth and a trumpet of the deepest intense orange we have yet found in any Daffodil. The plant is of strong constitution and should make a valuable parent for breeding from. AWARD OF MERIT FOR SHOW, R.H.S. April 13th, 1920	2 2 0	
Ormolu (<i>Barrii</i>) (3), xxxx, a beautiful flower, with pale lemon perianth passing to white, and a flattish brilliant orange-red crown, ht. 19 in. AWARD OF MERIT, BIRMINGHAM ...	0 10 6

Phineus (<i>Incomparabilis</i>) (4), xxxx, perianth sulphur, shaded canary-yellow, broad and campanulate, crown deep golden, goblet-shaped, very distinct and fine, ht. 21 in. AWARD OF MERIT R.H.S. 1919 as an Exhibition flower	3 3 0	
Primrose Gem (<i>Triandrus Hybrid</i>) (4), xxxx, new 1919, flower of the same graceful form as Queen of Spain but colour a beautiful soft primrose ; a charming flower, ht. 18 in.	2 2 0	
Prince Arthur (<i>Giant Leedsii</i>) (4), xxxx, new 1919, having a broad well imbricated white perianth and a fine bold expanding crown, primrose shaded lemon, ht. 15 in.	2 2 0	
Prince Fushimi (<i>Giant Incomparabilis</i>) (4), xxxx, new 1919, flower very large with solid pure white perianth and a large open globular cup, apricot-orange shading down to a delicate cream or ivory-white, prettily crinkled and flanged. A remarkably distinct and beautiful flower ; strong robust grower, ht. 16 in. AWARD OF MERIT R.H.S. 1919.....	2 2 0	
Queen Maya (Trumpet Daffodil) xxx½, new 1919, perianth cream shaded sulphur, trumpet soft canary-yellow, of beautiful form, deeply frilled expanded mouth, ht. 17 in. ...	I I O	
Raeburn (<i>Poeticus</i>) (4), xxxx, a flower of fine quality, having smooth rounded snow-white perianth, and a large flat lemon-yellow eye, shaded dark green and broadly margined dark crimson-red, ht. 18 in. THE PREMIER <i>Poeticus</i> LONDON 1913 and BIRMINGHAM 1914	I I O	
Ringdove (<i>Poeticus</i>) (6), xxxx, new 1914, the most perfectly formed flower of all the <i>Poeticus</i> and very chaste ; the perianth is snowy white, very rounded, perfectly smooth, and of solid wavy texture, while the centre is heavily margined red. A perfect show flower, retaining its form up to the last, ht. 18 in.	5 5 0	
Seawald (Trumpet Daffodil) (3), xxx, new 1920, a very large flower with broad creamy perianth and large bold canary-yellow trumpet with open mouth, ht. 15 in.	0 7 6	
Sir Gawain (Trumpet Daffodil) (3), xxx½, new 1920, a grand large elegant flower, perianth white, broad, imbricated and slightly reflexing, trumpet primrose, long and with open mouth, ht. 17 in.	I I O	
St. Wendrona (Trumpet Daffodil) (4), xxx½, new 1919, flower of a beautiful soft colour, perianth cream, trumpet soft primrose of elegant form, prettily frilled at mouth, ht. 13 in.	2 2 0	
Sweet Nancy (<i>Jonquil Hybrid</i>) xxx, new 1919, flower 3 inches across, of a nice soft colour, perianth soft yellow, broad and imbricated, crown short, bright yellow, deeply flanged, fragrant, ht. 22 in.	0 15 0	
Walwyn (Trumpet Daffodil) (3), xx½, new 1920, perianth white, long and pointed, trumpet long and narrow, delicate primrose, an elegant flower, ht. 14 in.per doz. 7/6	0 0 8	
Wendy (<i>Incomparabilis</i>) (3), xxxx, a shapely and beautiful flower with well imbricated pointed white perianth and large expanded fluted crown, buff shaded apricot, ht. 10 in. ...	I I O	
White Pearl (<i>Giant Leedsii</i>) (4), xxxx, new 1919, flower snowy white throughout, measuring 4½ inches across, perianth broad, crown resembling a short broad trumpet, expanded at mouth and regularly frilled ; a very lovely flower, ht. 18 in.	1 15 0	
White Star (<i>Barrii</i>) (3), xxx, large pure white reflexing perianth and small lemon crown with green base ; a charming flower, ht. 21 in. AWARD OF MERIT BIRMINGHAM and TRURO	0 10 6	

Barr's "Gold Medal" Daffodils

**Awarded Forty-seven Gold Medals, Three Silver Challenge Cups,
and Two R.H.S. Silver Cups for New Seedlings**

Also many First-class Certificates and other high awards.

For Alphabetical Index, see p. 2 of Cover. New Seedling Varieties, p. 6.

Classification.—In the following pages we have practically adopted the 1910 classification of the R.H.S. Narcissus Committee, which we hope will be of assistance to exhibitors of Daffodils and to amateurs who desire to make a selection of distinct types. As will be seen, 10 distinct divisions have been made, together with a section (Div. XI.) at the end to take in a few unclassed species and hybrids. With each division we have given its distinguishing character.

Time of Flowering.—The relative period of flowering of the different varieties out of doors we have denoted by means of numbers after the names, (1) being the earliest, (6) being the latest.

Height.—The heights given in inches are as recorded at our Nurseries.

Quality of Flower.—Each season we go carefully over our Daffodil collection with a view to recording the quality of each variety. This we indicate by x, xx, xxx, and xxxx, giving the most marks to those we judge to be the finest. We trust this record may be found useful to amateurs in making their selections.

Cultural Marks.—* The varieties marked thus * thrive best under the shade of deciduous trees, naturalised in grass in shady nooks, or on grassy slopes facing north.

† indicates those kinds which should be selected where Daffodils are grown in pots or for exhibition ; they are, however, in most cases also splendid border varieties.

§ indicates those Daffodils which, besides being fine border plants, make a pretty effect when naturalised in grass ; they are all strong growers and free bloomers.

Time to Plant.—The best time to plant, to obtain the finest flowers, is early Autumn (as early as possible), although bulbs may be put in as late as Christmas with fairly satisfactory results ; we have planted some Daffodils as late as the second week in February, and had some very good blooms in May. We recommend, however, early planting for best results.

Depth to Plant.—Failures with bulbs are most frequently due to their having been planted too deeply or too shallow. A good general rule to follow is to cover the bulb with soil once and a half to twice its own depth, measuring the bulb from base to shoulder. Thus a daffodil bulb measuring two inches from base to shoulder should be covered with three to four inches of soil.

DIVISION I.—TRUMPET DAFFODILS.

DISTINGUISHING CHARACTER.—TRUMPET OR CROWN AS LONG AS OR LONGER THAN THE PERIANTH SEGMENTS.

(A) YELLOW AND SULPHUR-COLOURED TRUMPET DAFFODILS.

With Yellow, Lemon or Sulphur-coloured Trumpets, Perianth of same shade or lighter (but not white).

DAFFODIL LORD ROBERTS.

YELLOW TRUMPET DAFFODILS—continued.

§M. J. Berkeley (2), $xx\frac{1}{2}$, resembling Maximus in shape, but colour is a clear yellow, per doz. each, the trumpet being much expanded and elegantly flanged at brim, a good border variety, ht. 17 in.	s. d. s. d.	per 100, 21/-	3 0...0 4
Minimus , true (1). We are glad to be again able to offer this little gem. It is about the smallest and dwarfest of all Daffodils, and produces outdoors in February dainty little trumpet flowers of a rich full yellow, height about 3 inches. It likes a peaty soil and may be naturalised on rockeries or in grass, or grown in pots or pans for the Alpine house. In 1887, during a tour in Spain, the late Mr. Peter Barr found this miniature Daffodil growing freely amongst gorse, with a south aspect. <i>For our annual supply we have to depend upon collected bulbs which are taken up while the foliage is green: in consequence there is a possibility that all the bulbs may not bloom the first season, but a proportion will</i>	per 100, 25/-	3 6...0 4	
† Monarch (3), xxxx, raised at our Nurseries, a noble flower, and one of the most refined of all the Giant Golden Trumpets; perianth and trumpet rich full yellow and very large, of perfect form and fine substance, growth strong and sturdy, ht. 20 in.	18 6...1 9		
* Nanus , true (1), rich full yellow, very dwarf and early, a gem for edgings and naturalising on grassy banks, etc., ht. 6 in.; now very scarce. <i>Lobularis</i> is generally sold for it, but is very different in many ways....	per 100, 27/6	3 9...0 4	
§* Obvallaris (Tenby Daffodil) (1), xx, an attractive Daffodil of medium size with flowers of pleasing symmetry, perianth and trumpet full yellow, <i>very early</i> ; it is best grown in partial shade, and is a fine variety for naturalising in grass, ht. 12 in. <i>This charming Daffodil has now become very scarce.</i>	per 100, 21/-	3 0...0 4	
§† Olympia (3), xxx, a good showy variety with bright yellow perianth and a bold deep yellow trumpet of enormous size, ht. 21 in. AWARD OF MERIT FOR POT CULTURE R.H.S. 1914.	12 6...1 3		
† Rev. D. R. Williamson (3), xxx, raised at our Nurseries, colour rich yellow with long handsome trumpet, a fine bold flower, ht. 19 in.	10 6...1 0

Talma (1), a handsome decorative Daffodil for the flower border or for early forcing. The flowers are bright yellow, with a large open trumpet deeply flanged and frilled at brim, and are thrown well above the erect foliage, ht. 22 in. It may be forced into bloom as early as the end of January	per 100, 42/-	5 6...0 6	
† Van Waveren's Giant (3), xxx, a giant Trumpet Daffodil, flowers of immense size, perianth primrose and of rather campanulate form, trumpet bright yellow with very large open mouth, flanged at brim, ht. 18 in.	21 0...2 0		

(B) WHITE TRUMPET DAFFODILS.

Varieties with White Perianth and White or nearly White Trumpet.

LADY AUDREY.

Most of the Daffodils in this section thrive best in fibrous virgin loam, mixed with well-decayed leaf-soil; generally speaking they dislike manure; where, however, the soil is very poor, bone-meal or basic slag may be used (for full directions, see page 1). *The varieties marked thus * thrive best in the shade of deciduous trees, naturalised in shady grassy nooks, or on grassy slopes facing north.*

†**Ailsa**, xxxx, a beautiful chaste flower, perianth per doz. each, pure white, trumpet white, large and bold with recurved margin. AWARD OF MERIT R.H.S. — 17 6

†**Alice Knights** (1), xxx, raised at our Nurseries, the earliest of white Trumpet Daffodils and a beautiful flower; perianth white, trumpet creamy white of elegant form with prettily frilled open mouth; the whole flower is of great substance and lasts well, whether cut or on the plant; ht. 14 in. AWARD OF MERIT R.H.S. 1915, as a pot plant per 100, 75/- 10 6...1 0

It makes a good pot-plant and may be gently forced. AWARDED A FIRST-CLASS CERTIFICATE R.H.S., 1894, and PREMIER PRIZE by the MIDLAND DAFFODIL SOCIETY. Blooms of this Daffodil have been exhibited measuring 5 inches across. See Illustration, page 13	12 6...1 3	

INCOMPARABILIS LUCIFER.

DIV. II.—INCOMPARABILIS.

Large Chalice-Cupped Daffodils or Star Narcissi.

DISTINGUISHING CHARACTERS.—CUP OR CROWN MEASURING FROM ONE-THIRD TO NEARLY THE LENGTH OF THE PERIANTH SEGMENTS.

All the varieties have yellow or white perianth and yellow or red-stained cups.

These beautiful Star Narcissi commence flowering in March, and furnish a succession of bloom throughout April. All are of elegant beauty, and as cut flowers are extensively used for furnishing vases and table bouquets. For this purpose they should be grown in quantity in boxes and forced for early bloom (see pages 1 & 2). They make charming pot plants, while in beds and borders they are very showy and naturalised in grass they produce a graceful effect. We illustrate *Lucifer* as an example of a flower in this Division.

	per doz. each.	s. d. s. d.

BARRII SEAGULL.

Example of a Flower in Division III.

DIVISION III.—BARRII.

Short-Cupped Daffodils, or Star Narcissi.
(Including those hitherto classed as Burbridgel.)

DISTINGUISHING CHARACTER.—CUP OR CROWN MEASURING LESS THAN ONE-THIRD THE LENGTH OF THE PERIANTH SEGMENTS.

All the varietes have yellow or white perianth and yellow or red-stained cups.

For a long time trouble was being experienced in the placing of certain new seedlings under the Barril and Burbridgei sections, as the two divisions ran so much into one another. The revising committee therefore decided to make only one section of them, retaining the name Barril.

The chaste beauty of these shorter-cupped Narcissi is the more highly appreciated when the cut flowers are seen arranged in vases. The brilliancy of colouring in the cups of some, and the dainty elegance of others, render them all more or less valuable exhibition flowers. The cheaper kinds we can strongly recommend for beds and borders, and for naturalising in grass, woodlands, wild gardens, etc.

	per doz. each.
† Adonia (6), xxx, perianth broad and fluted; excellent for cutting, ht. 17 in.	cream-coloured, cup fiery orange-scarlet, prettily s. d. s. d.

LEEDSII ARIADNE.

DIVISION IV.—LEEDSII.

Eucharis-flowered or Silver-White Fragrant Star Narcissi.

Comprising all Star Narcissi (large chalice-cupped and short-cupped) which have pure white or silvery white perianth segments and cup or crown white, cream, buff-orange, apricot or pale citron.

In the working out of the new classification, the revising committee felt that it would be unwise to break up this section and distribute it among the Incomparabilis and Barrii forms, seeing how distinct a "colour" section it was, and how well known to all Daffodil growers.

These chaste and beautiful Daffodils are highly prized for indoor decoration, while to cut for bouquets their fragrant flowers are greatly in demand. Plant 3 or 5 bulbs in a 5-inch pot. In flower beds and borders they are most charming, while naturalised in grass they produce a lovely effect.

TRIANDRUS ALBUS ON ROCKWORK.

DIV. V.—TRIANDRUS AND
TRIANDRUS HYBRIDS.

Under this division are placed Triandrus varieties and all hybrids obviously containing Triandrus blood, such as Queen of Spain (a wild Triandrus Hybrid), Agnes Harvey, J. T. Bennett-Poë, Madonna, etc.

The introduction of Triandrus blood in hybridising has resulted in such a very distinct group of hybrids that the Classification Committee of the R.H.S. deemed it advisable to make one section of them. For grace and beauty they are unsurpassed. We recommend them being given a situation partly shaded by trees, and if a little very fine dwarf grass seed is sown amongst them, the beauty of their flowers is enhanced. Once planted they may remain undisturbed for years.

NARCISSUS TRIANDRUS.

The Cyclamen-flowered Daffodils with reflexing perianth.

THE DAINTY LITTLE "ANGEL'S TEARS" DAFFODIL (*Triandrus albus*) was found by the late Mr. Peter Barr on the mountains of Portugal and Spain, growing in very hard, firm, fine gritty soil, sometimes in the narrowest fissures of granite and slatestone rocks. All in this section make lovely little pot plants (three or more bulbs in a pot), and grown thus should be given cold frame culture. Established on rockwork they form a picture full of grace and beauty. They prefer shade, a gritty soil, and a well-drained position.

† **Triandrus albus** (3), an exquisitely beautiful little species, appropriately called per doz. each.
the "Angel's Tears" Daffodil; it is of slender growth, and produces a cluster of s. d. s. d.
elegant little creamy white flowers with globular cup and perianth reflexing as in the
Cyclamen, ht. 7 in. We are glad to be able to again offer our customers some collected
bulbs of this little Daffodil. As these have to be taken up while the foliage is still green, a
proportion may possibly not bloom the first season. The bulbs should therefore be left
undisturbed to establish themselves per 100, 12/6 1 9...0 2

"	"	"	"	"	A few home-grown bulbs, „	45/-	6	0...0	7

NARCISSUS TRIANDRUS—continued.

†Triandrus calathinus (3). One of the most beautiful little Daffodils in per doz. each existence. The flowers, which are produced in drooping clusters of two or three, are s. d. s. d. snowy white, and more than twice the size of *Triandrus albus*, with long goblet-shaped crown prettily fluted; the foliage has a curious habit of curling over, ht. 7 in. For pot culture and rockwork it is a perfect gem. The late Mr. Peter Barr collected this rare Daffodil some years ago on the Isle of Glénan, Brittany, the collecting being attended with a good deal of risk. Unfortunately it is no longer to be found there, the sea having washed away all trace of it, but we have been able to continue raising stock from seed. AWARD OF MERIT R.H.S. March 3rd, 1920..... 16 0...1 6

NARCISSUS TRIANDRUS HYBRIDS.

Of these QUEEN OF SPAIN is a natural hybrid of *Triandrus albus* and a *wild trumpet Daffodil*. The other varieties have all been produced by using *Triandrus albus* or *calathinus* pollen on trumpet and other Daffodils. They form a distinct class, having flowers more or less drooping, of elegant form and graceful habit, clearly showing their *Triandrus* parentage.

NARCISSUS QUEEN OF SPAIN.

§†Queen of Spain (3), xxx, a wild hybrid discovered by per doz. each the late Mr. Peter Barr in Spain. One of the most s. d. s. d. beautiful, distinct, and graceful Daffodils in cultivation, and recommended either for bedding, pot or vase culture, or for naturalising in woodlands, etc. The flowers vary slightly in size, but all are of a uniform soft, delicate, clear yellow, with a gracefully reflexing perianth, trumpet of distinct and elegant form, ht. 12 in. Naturalised in grass under trees, this Daffodil forms a delightful feature in the garden. It also adapts itself readily to bowl culture in the Peat-fibre mixture, and grown thus affords an artistic decoration for the sitting-room. Owing to the bulbs having to be collected while the foliage is still green, some may not bloom the first year, but we expect a good proportion to do so.

DIVISION VI.—CYCLAMINEUS & CYCLAMINEUS HYBRIDS.

Seeing that *Cyclamineus* blood, like that of *Triandrus*, imparts such a distinct form to Daffodils, a separate division has been made for its hybrids. It has been used by many hybridisers as a parent, but as a rule the progeny has not been long-lived. It is possible, however, that we may yet obtain hybrids with a stronger constitution to come under this division.

Barr's New Peat-fibre, Shell and Charcoal Mixture.

The best medium for growing bulbs in Vases, Bowls, Jardinettes, etc., 4/6 per bushel; 1/6 per peck.

For Full Cultural Directions, see page 2. For suitable Bowls, see our General Bulb Catalogue.

NARCISSUS CYCLAMINEUS AND CYCLAMINEUS HYBRIDS—continued.

Cyclamineus (1), the Yellow Cyclamen-flowered Daffodil. per doz. each.
s. d. s. d.

NARCISSUS CYCLAMINEUS ESTABLISHED
ON ROCKWORK.

This beautiful little Daffodil was re-introduced into cultivation in 1887 by A. W. Tait, Esq., of Oporto, after being lost sight of for 200 to 300 years. It is the earliest of all Daffodils and is a charming elegant little flower of very distinct form; the trumpet is rich yellow, straight and tube-like, elegantly serrated at mouth, while the perianth is reflexed as in a Cyclamen. A valuable little species for pot-culture, edgings, rockwork, and to naturalise in grass and shady nooks, or at the water's edge; it delights in a dampish sandy peat soil, ht. 6 in. NARCISSUS POETAZ—NEW HYBRID POLYANTHUS NARCISSI.New hybrids of *Poeticus Ornatus* × Best Forms of *Polyanthus Narcissi*.

POETAZ ELVIRA.

A fine new race of Daffodils, resulting from a cross between *Poeticus ornatus* and the finest varieties of *Polyanthus* or *Bunch-flowered Narcissi*, the *Poëticus* being the seed-bearing parent. The plants are tall and vigorous growers, bearing heads of large well-formed flowers, deliciously fragrant; they are much finer and more showy than the old *Polyanthus Narcissi*, and have the advantage of being much hardier. In pots or the flower border they are very decorative, while the flowers are highly prized for cutting. They can easily be brought into bloom early by gentle forcing.

†Admiration, a very handsome showy variety, per doz. each. bearing several flowers on a stem, perianth s. d. s. d. light yellow, cup heavily margined scarlet ... 10 6...1 0

†Aspasia (3), xxx, producing four to five large bold flowers on a stem, with broad solid white perianth and golden cup, very prettily fluted, ht. 21 in.per 100, 37/6 5 0...0 6

†Bouquet Enorme, a giant variety, producing on very stout stems heads of large flowers with broad white perianth and yellow cup 12 6...1 3

†Elvira (3), xxx, bearing on long, graceful stems heads of 3 to 4 large flowers with broad solid white petals of great substance and a bright yellow cup edged orange, delicately fragrant, ht. 24 in. AWARD OF MERIT R.H.S.per 100, 35/- 5 0...0 6

†Helios, bearing a fine head of flowers, perianth creamy yellow, cup bright yellow, a good forcer. AWARD OF MERIT, HAARLEM 1917per 100, 32/6 4 6...0 5

†Jaune à Merveille (4), xxx, a handsome variety, four to six flowers on a stem, with large broad soft primrose perianth and bright yellow cup, thinly edged orange, of good form, ht. 21 in. 7 6...0 8

†Klondyke (4), xxx, a fine showy variety with primrose-yellow perianth and golden fluted cup, five to seven large flowers on a stem 7 6...0 8

†Lucrèce, very attractive, flowers large with pure white perianth and rich orange cup... 10 6...1 0

†Orange Cup, bearing a cluster of showy flowers, perianth primrose-yellow, cup brilliant orange prettily frilledper 100, 75/- 10 6...1 0

†Sycamore, a beautiful variety, the flowers having a pure white perianth and a deep golden-yellow cup. AWARD OF MERIT, HAARLEM 1919per 100, 42/- 5 6...0 6

†Triumph (3), xxxx, bearing about three very large flowers on a stem, perianth broad and snowy white, cup golden-yellow prettily fluted, ht. 16 in. 6 6...0 7

VARIOUS TAZETTA HYBRIDS.

§TRIDYMUS Cloth of Gold (3), xxx, a very striking, decorative bedding variety lasting long in condition, each stem bearing three to five sweetly scented flowers of the richest golden-yellow; robust grower and free bloomer, valuable as a cut flower, ht. 14 in. 8 6...0 9

CANALICULATUS, a dainty little species only suitable for sunny situations on rock-work; it has narrow erect bluish green foliage and bears heads of 3 to 4 flowers with white reflexing perianth and globular golden cup, sweetly scented, ht. 6 in.per 100, 32/6 4 6...0 5

Glandore. See New Seedling Daffodils, page 7..... — 3 6

§INTERMEDIUS "SUNSET" (3), xxx, canary-yellow perianth and large glowing orange-red cup, 4 to 5 flowers on a stem, remarkably showy, ht. 16 in. AWARD OF MERIT R.H.S. 7 6...0 8

DIVISION IX.—POETICUS—True Poet's Narcissi.

These "Poet's" Daffodils or Narcissi all have snowy white perianth segments or petals, and a small flattened eye or crown, yellow or lemon edged more or less deeply with scarlet or crimson, and sometimes almost all scarlet. All are sweetly scented.

The earlier flowering varieties afford a very beautiful decoration indoors when grown in pots (5 bulbs in a pot) or forced. As border plants and naturalised in grass by themselves the Poet's Narcissi produce a lovely effect.

Early planting and liberal culture is specially recommended for these Poet's Daffodils.

To obtain tall stems and fine large flowers they should be grown in a rich deep soil not too dry. The varieties having very highly coloured crowns should be cut young to preserve the fine colouring.

per doz. each.
s. d. s. d.

§† Caedmon (4), xxxx, a most striking and beautiful Poet Narcissus, flower very large with broad snowy white perianth of great substance, and a very bold centre broadly rimmed dark red and having a rich green eye. DIVISION X.—DOUBLE VARIETIES.

(A) DOUBLE TRUMPET DAFFODILS.

All the Double Trumpet Daffodils thrive admirably when planted in grassland and allowed to remain undisturbed. They are seen to great advantage when planted in clumps in permanent borders, and as pot-plants they are very attractive (several bulbs in a pot).

* Capax Plenus (<i>syn. Eystettensis</i>), Queen Anne's Double Daffodil (1), xxx, per doz. each. native of Ireland, beautiful soft pale lemon-coloured flowers, consisting of six rows of petals, symmetrically arranged over each other in the form of a star, ht. 7 in.	s. d. s. d. 10 6...1 0
* Cernuus Plenus (The Old Double White Trumpet Daffodil) (1), xxxx, native of England, flowers silvery white, of exquisite beauty, sometimes coming with a perfectly formed trumpet, but sometimes broken up into a rosette. For successful culture plant in shade in good virgin pasture-loam, avoiding manure, and leave it to become established, ht. 10 in. This beautiful Daffodil has become very scarce	— ... 4 6
§† Telamonius Plenus (Wilmer's Great Double Golden-yellow Daffodil) (2), xx, the large Old Double Yellow Trumpet Daffodil; valuable for naturalising in woodlands, etc., also for early forcing. <i>Good flowering bulbs for borders and naturalising,</i>	per 100, 25/- 3 6...0 4
“ “ <i>Extra strong bulbs for pot-culture and forcing, etc.</i> per 100, 35/-	5 0...0 6

BARR'S PHYTOBROMA.

The best and safest manure for Daffodils, Hyacinths, Tulips and all Spring flowering bulbs—2-lb. carton, 1/3; 7 lbs. 3/-; 14 lbs. 5/6; 28 lbs. 10/6; 56 lbs. 20/-; 1 cwt. 38/-.

(B) DOUBLE INCOMPARABILIS NARCISSI.

The Double Rose-flowered Daffodils.

The large massive flowers of these are greatly prized for bouquets and vases, mixing well with other flowers and foliage in decoration. As pot plants (3 to 6 bulbs in a pot) they are very charming, while in beds, borders, or naturalised they make a most effective display.

DOUBLE NARCISSUS, ARGENT.

Milk and Honey. See New Seedling Daffodils, page 7	each £1 1s.	—	—
†Primrose Phoenix (4), xxxx, a valuable addition to this section of Double Daffodils; the large double rose-shaped flowers are of a beautiful soft lemon shade; much prized for vases, ht. 20 in. AWARD OF MERIT R.H.S. 1902.....	per 100, 32/-	16	0...1 6
Volcano , xxxx, the most brilliantly coloured of the Double Incomparabilis varieties, flowers measuring over 3 inches across, primrose-yellow with large brilliant orange centre shaded scarlet, very decorative, ht. 16 in.	each £1 1s.	—	—

(C) DOUBLE SWEET-SCENTED JONQUILS.

Jonquilla flore-pleno (The Old Double Sweet Jonquil), producing in May little heads of rich yellow double flowers, very fragrant	per 100, 15/-	2	3...0	3
*Odorus Campanelle plenus (The Tall Double Campanelle Jonquil) (3), xx, a very charming variety, bearing heads of fragrant double yellow flowers of elegant form, on tall graceful stems, ht. 15 in. It makes an attractive pot and border plant, and will bear gentle forcing	per 100, 21/-	3	0...0	4

(D) DOUBLE POETICUS NARCISSUS.

The Gardenia-flowered Sweet-scented Narcissus.

Double White Poëticus (6), xxx, large double snowy white sweet-scented Gardenia-like blossoms, much prized for cutting, ht. 15 in. To obtain fine handsome flowers this Narcissus should be planted early in a good deep cool soil not too dry	per 1000, 90/-; per 100, 9/6	1	4...	—
,, ,, ,, Extra fine selected strain,	,, 150/-; ,, 16/-	2	4...	—

DIVISION XI.—VARIOUS SPECIES AND HYBRIDS.

Distinct forms which cannot be classed under any of the foregoing divisions.

NARCISSUS BULBOCODIUM (CORBULARIA).

The Hoop Petticoat, or Medusa's Trumpet Daffodils.

For rockwork, edgings and small beds, these beautiful little Daffodils are most charming, while if several bulbs are planted in pots or pans, they are greatly prized for indoor decoration.

Large Sulphur Hoop Petticoat (Bulbocodium citrinum) (3), xx, native of per doz. each, the Pyrenees, very beautiful pale citron-yellow, ht. 6 to 8 in.; delights in a dampish sandy peat soil. The collected bulbs, which have to be lifted while in growth, will not all bloom the first season; they should therefore be left undisturbed to establish themselves.

Collected bulbs, per 1000, 110/-; per 100, 12/6	1	9...0	2	
,, ,, Extra selected,	,, 16/6	2	4...0	3

VARIOUS SPECIES AND HYBRIDS—continued.

WHITE HOOP PETTICOAT
(Half natural size).

White Hoop Petticoat (*Bulbocodium monophyllum* per doz. each. or *Clusii*) (1), native of N. Africa, producing in winter little s. d. s. d. snowy white flowers of exquisite beauty; grow in pots, in frames, or at the foot of hot dry walls, and as soon as signs of growth are seen, give water freely; ht. 6 in. We have these bulbs collected for us from North Africa, and only a proportion will flower the first season. They should therefore be allowed to remain where planted so as to become established ...per 100, 42/- 5 6...o 6

†**Large Yellow Hoop Petticoat** (true) (*Bulbocodium conspicuum*) (4), flowers rich golden-yellow, ht. 6 in.; prefers a dampish sandy peat soil. A fair proportion of the bulbs flower the first year. Now very scarceper 100, 55/- 7 6...o 8

Early-flowering Yellow Hoop Petticoat (2), found in Spain by the late Mr. Peter Barr, rich golden-yellow, flowering outdoors from February, ht. 6 in.; delights in a dampish sandy peat soil. Only a few home-grown bulbs available this year

per 100, 60/- 8 6...o 9

§**GRACILIS** (7), xx, a very beautiful little rush-leaved Daffodil, bearing 3 to 5 light yellow Jonquil-like sweet-scented flowers; the last of the family to bloom, opening about end of May, ht. 14 in.....per 100, 42/- 5 6...o 6

JUNCIFOLIUS (The Miniature Rushleaved Daffodil) (4), xxx, a charming and elegant little species for pots or for select spots on rockwork; it has small graceful rich yellow flowers, about the size of a buttercup, with a perfectly flat little crown, ht. 3 to 4 in., flowers delicately fragrant, a native of the Pyrenees.....per 100, 21/- 3 0...o 4

SEROTINUS, a rare little Narcissus, producing in October, on slender stems, miniature star-shaped flowers with silvery white perianth and a minute golden-yellow cup, sometimes two to three flowers on a stem, fragrant, ht. 10 in. Plant in a warm spot on rockwork and lightly cover during winter; or grow in pots in cold frame:..... 4 6...o 5

§**TENUIOR** (the Slender Straw-coloured Daffodil or Silver Jonquil) (4), xx, a very elegant slender-growing Daffodil, having several flowers on a stem, perianth cream, cup sulphur-yellow, ht. 9 in.....per 100, 17/6 2 6..o 3

NERINES.

THE MOST BEAUTIFUL OF AUTUMN FLOWERS FOR THE GREENHOUSE.

A HYBRID NERINE.

For Autumn decoration in the greenhouse few plants can compare with **Nerines** for their brilliant and attractive colours, which form a pleasing contrast to the prevailing tints of this period of the year. The flowers, which are produced in umbels of 6 to 24 blooms, are borne on stout stems varying in height from 1 to 2 ft. In colour they range from dark red, vivid crimson, cerise, and scarlet to salmon, coral-rose, pink, blush, and white, many having a glistening lustre which in sunlight gives them the appearance of being dusted with gold or silver. In some cases the flowers have a well-defined bar or stripe running up centre of petal which adds to their charm. They remain decorative for many weeks, and their beauty may be enjoyed in a sitting-room as well as the greenhouse, if the pots are kept in a sunny window.

The cut spikes, which last fresh a long time, are greatly appreciated for table decoration associated with some light graceful foliage like that of Maidenhair Fern.

The varieties we offer below are mostly **New Seedlings**, comprising new shades of colour and new forms; they are freer bloomers, and in some cases of taller growth, and with larger flowers than any of the older kinds.

CULTURE.—**Nerines** can be very easily grown by any one who has a glass structure from which frost can be excluded. *Plenty of air and sunshine* are their principal requirements. After the bulbs have finished flowering, place the pots on an airy sunny shelf close to the glass, and encourage a free foliage growth by giving occasionally a

little weak liquid manure. In April or May, when the foliage commences to turn yellow, cease giving water and allow the bulbs to ripen off in their pots. As soon as the plants show signs of making fresh growth in August or early September, stand the pots in saucers of water for a few hours to ensure the soil being uniformly moist, and then give water sparingly until the flower spikes are well advanced.

BARR'S NEW SEEDLING NERINES, 1920.

NERINES—continued.

Nerines bloom most freely when well established in pots. Re-pot every third or fourth year. In potting, put in plenty of crocks to ensure good drainage, and use a compost of two-thirds good loam and one-third sand, with a sprinkling of well-decayed leaf soil or old manure and bonemeal.

Our Exhibit of New Hybrid Nerines was awarded by the R.H.S. a Silver Banksian Medal, November 1914, and a Silver Flora Medal November 1916.

	each—s. d.
Afterglow , rich glowing rose, petals marginated pink, large open flower with waved petals, fine truss	42 0

MANURES, SOILS, PEAT-FIBRE, etc.

Barr's Phytobroma, the best Manure for Daffodils, Hyacinths, Tulips, etc., and for Flower Borders generally. It should be mixed with the soil *below* the bulbs at planting time at the rate of 2 to 3 ozs. to the square yard, and in spring, when the bulbs are showing above ground, a top-dressing may be given of 3 oz. to the square yard. For Pots, mix *Phytobroma* with the soil, to be used at the rate of 1 lb. to the bushel, and in Spring, when growth is showing, top-dress once a fortnight, using a small teaspoonful and well mixing with surface soil. Leaflet with further particulars on application. 2-lb. carton 1/3; 7 lb. 3/-; 14 lb. 5/6; 28 lb. 10/6; 56 lb. 20/-; 112 lb. 38/-.

Basic Slag, 14 lb. 2/-; 28 lb. 3/6; 56 lb. 6/6; per cwt. 12/6.

Bone Meal (*Genuine fine Crushed Bones*), best quality, 7 lb. 2/6; 14 lb. 4/6; 28 lb. 8/6; per cwt. 32/-.

Bone Flour, best quality, 7 lb. 2/-; 14 lb. 3/6; 28 lb. 6/6; 56 lb. 12/6; per cwt. 24/-.

Nitrate of Soda, 7 lb. 3/6; 14 lb. 6/6; 28 lb. 12/6; 56 lb. 24/-; per cwt. 45/-.

Sulphate of Ammonia, 7 lb. 3/3; 14 lb. 6/-; 28 lb. 11/6; 56 lb. 21/-; per cwt. 40/-.

Sulphate of Potash, 7 lb. 4/6; 14 lb. 8/6; 28 lb. 16/-; 56 lb. 30/-.

Superphosphate of Lime, 7 lb. 1/6; 14 lb. 2/9; 28 lb. 5/-; 56 lb. 9/6; per cwt. 18/6.

Tipulite, soil fumigant and insecticide, destroys ants, leatherjackets, slugs, wireworm and all soil grubs; harmless to plant life. In tins 1/6 and 2/3 each; 14 lb. 3/3; 28 lb. 5/-; 56 lb. 9/-; 1 cwt. 15/-.

Vaporite, destroys Wireworm, Woodlice, and other injurious soil pests, small tin, 1/4 $\frac{1}{2}$; about 7 lb. tin, 3/4; about 14 lb., 5/-; about 28 lb., 7/2; $\frac{1}{2}$ cwt., 9/9; 1 cwt. 16/6. Full particulars on application.

Loam, Peat, Leaf Soil, Silver Sand, each, per bushel, 4/6.

Lime, fine ground, per bushel, 4/6.

Barr's Specially Prepared Potting Soil, containing a suitable quantity of *Phytobroma*, per bushel, 3/6.

Barr's Improved Peat-fibre, Shell, and Charcoal Mixture for growing Bulbs in Bowls, Jardinets, Glasses, etc. In the case of glasses, half fill with the Fibre Mixture, and add water till no more can be absorbed. Place the bulb so as to rest the base on the preparation, and tie down with brown paper, leaving an opening in the centre of the paper for the shoot. When the bulb has well rooted the paper may be removed; care must be taken that the material in the glass is kept moist. The same remarks apply to bulbs grown in bowls, etc.: they must be kept in place till they have rooted. Our Fibre Mixture is sent out *ready for use*. Per bushel 4/6; per peck 1/6

Peat-fibre, recommended in preference to Cocoa-fibre for plunging bowls, pots, etc., and as a winter mulch to bulb-beds, etc., per bushel, 2/6.

Small Pebbles and Charcoal, suitable for growing Hyacinths, etc., in bowls and vases without drainage, per quart 8d.; per peck 4/6.

Charcoal (fine twig), per peck, 1/6; per bushel, 5/6.

TWO USEFUL TOOLS FOR DAFFODIL PLANTING.

Barr's Special Bulb Planter, specially designed for planting Daffodils and other bulbs in grass. This tool cuts and lifts a clean circular piece of turf, which is released from the cup when the second hole is made, and lies ready at hand to fill in the holes when the bulbs have

been put in, it being only necessary to remove a little of the soil from the bottom of the sod. A time must be chosen for planting when the ground has become softened after early Autumn rains, and not when in a hard and baked condition, as it is then impossible to use this, or indeed any other tool with success. By the use of **BARR'S SPECIAL BULB PLANTER** a large number of

bulbs may be planted in a very short time, and without the least disturbance of the sward. The length of the tool is 38 inches over all, weight about 3 $\frac{1}{2}$ lbs. The cup is manufactured from high-class hardened steel and always carries a keen cutting edge.

Supplied in 3 sizes of cup:—To cut out a circular hole 2 inches diameter
 " " " 2 $\frac{1}{2}$ " " } 25/- each.

We shall send the medium size (2 $\frac{1}{4}$ in.) if no instructions to the contrary are given.

Barr's Special Bulb Dibber, specially designed for dibbling bulbs into borders, etc.; steel shod, with strong iron tread and cross wooden handle; a good strong heavy tool, weight about 6 $\frac{1}{2}$ lbs., length 36 inches over all. 18/6 each.

Special Notices and Terms of Business.

CARRIAGE OF BULBS.

Orders for Bulbs to value of 40s. and upwards sent Carriage Paid to any Railway Station in the United Kingdom.

The above carriage terms do not include manures, soils, or tools. These will either be sent by goods train, carriage forward, or consigned at lowest rate and carriage charged on invoice.

5% Cash Discount on Bulb Orders of 40s. and upwards.—1s. in the £ discount is allowed on Bulb Orders of 40/- and upwards for Cash with Order (*with the exception of the special Collections offered on pages 4 and 5, which are strictly nett*). The same discount may also be deducted from all Bulb Accounts of 40s. and upwards when paid within 14 days from date of invoice (*excepting Collections offered on pages 4 and 5, which are nett*).

Terms of Credit.—Our books are made up half-yearly, when all accounts are due nett. Interest at the rate of 5% per annum will be charged on overdue Accounts.

Remittances.—Money Orders and Postal Orders should be made payable at Bedford Street Post Office; these and all Cheques should be crossed "London County, Westminster and Parr's Bank." Small amounts may be remitted in Postage Stamps, or Coin in a Registered Letter.

Packages.—Boxes, Bags, etc., are charged at cost price, but these may be deducted from our account if returned Carriage Paid within a fortnight. *Returned empties should have the sender's name on the address label for identification, and an advice sent by post, stating date of despatch and name of Railway Co.*

Nurseries at Taplow, Bucks.—Visitors are invited during Spring to see our magnificent Collections of Daffodils and Tulips in bloom. The Nurseries are adjoining the main line of the Great Western Railway, and are entered from the Bath Road within quite a short distance of Taplow Station. Cab Rank at Taplow Station.

Naming Daffodils.—Cut specimens of Daffodils we undertake to name correctly, at the charge of 4d. each, 3s. per dozen, to cover attendant expenses. Address all cut specimens to be named, accompanied by a remittance, to our Nurseries, Taplow, Bucks.

Catalogues.—Our Seed Guide is published 1st of January, List of Bulbs and Tubers for Winter and Spring Planting 1st of February, List of Autumn-flowering Bulbs (Crocus species, Colchicums, etc.) in July, Daffodil and General Bulb Catalogues in August, Hardy Plant Catalogue Spring or Autumn. We are always pleased to forward any of these Catalogues, free of charge, to friends of our Customers on receipt of a line requesting us to do so.

Gardeners.—We keep a special Register of Gardeners in want of situations, and shall be pleased to put such in communication with any of our Customers requiring Head Gardeners.
